

Project Architect / Project Manager

Company Information

LCM Architects is a full service architecture practice. We maintain long term relationships with institutions of higher education, government agencies, commercial and multi-family clients, and are expanding our practice. We are looking for people interested in a dynamic professional environment creating solutions that meet our clients' goals and expectations. LCM believes that a work/life balance is important for everyone as part of a professional career. LCM also recognizes the demands of professional life and is happy to accommodate interview times outside of normal business hours.

About the Job

Working closely with the firm's partner in charge, responsibilities can include:

- Prepare design presentations;
- Organize Revit / BIM modeling internally and with project consultants;
- Coordinate with consultants;
- Field verify existing conditions;
- Research Building and Zoning Code requirements;
- Develop construction documents;
- Participate in Construction Administration, including shop drawing review, RFI response, field visits and construction observation

Requirements

LCM is looking for a professional who possesses creativity, technical knowledge, good communication and organizational skills, and works well in a collaborative environment. Skills needed include:

- Professional Degree, either Masters of Architecture or Bachelors of Architecture from an accredited university or college;
- 6+ years of experience;
- Technical documentation experience;
- Revit proficiency;
- Sensitivity to design and aesthetics

Compensation

Compensation will be based on experience and skills. LCM provides a competitive benefits package including health and dental insurance and a 401(k) savings plan.
